1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Koehler et al in view of Kurtz, Lin, or Maruyama et al.

Koehler et al discloses all of the claimed subject matter except for having magnetic members as opposed to a spring. Kurtz, Lin, or Maruyama et al disclose the use of opposed magnetic members in place of coil springs. It would have been obvious to one having ordinary skill in the art to form spring of Koehler et al as opposed magnetic members as such are obvious mechanical equivalents, lighter in weight and simpler in construction as taught by Kurtz, Lin, or Maruyama et al.

3. Claims 2-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koehler et al in view of Kurtz, Lin, or Maruyama et al as applied above, in further view of Bogni et al or Hsien.

Bogni et al or Hsien disclose hidden magnets. It would have been obvious to one having ordinary skill in the art to form the magnets of the device of Koehler et al as modified by Kurtz, Lin, or Maruyama et al as hidden to protect the magnets or provide a smooth outer surface as taught by Bogni et al or Hsien.
